Anthropology

Degree: Associate of Arts in Anthropology (AA)

LIBERAL ARTS

Program Description: Anthropologists study people and cultures around the world, their evolutionary history, and how they adapt to their environments. Anthropology examines past societies to learn about the present, and looks at interactions between culture and biology and the impact on human diversity.

The Associate of Arts degree in Anthropology provides students with the first two years of coursework towards a Bachelor of Arts degree in Anthropology, preparing them for transfer to an institution that grants a baccalaureate degree. This degree plan offers a broad background of liberal arts courses transferable to a four-year institution, focusing on the cultural and biological diversity of the human species.

Students who plan to transfer to an institution that grants a baccalaureate degree to continue their study of anthropology should refer to the catalog of that institution for their degree requirements and consult with an ACC full-time faculty member in Anthropology.
