

**Anthropology: Archaeology***Degree: Associate of Science in Archaeology (AS)***LIBERAL ARTS**

Transfer Program Description: Archaeology covers archaeological techniques for reconstructing ancient societies. Emphasis is placed on archaeological questions, scientific methods, and culture change.

The Associate of Science degree in Archaeology provides students with the first two years of coursework towards a Bachelor of Arts degree in anthropology with a specialization in archaeology. This degree plan offers a broad background of liberal arts and science courses transferable to a four-year institution, focusing on the archaeological, cultural, and biological diversity of the human species. Students who plan to transfer to an institution that grants a baccalaureate degree to continue their study of archaeology should refer to the catalog of that institution for their degree requirements and consult with an ACC full-time faculty member in Anthropology.

To receive an Associate of Science in Archaeology, students must make a minimum grade of C in all required anthropology, math, and science courses and have an overall GPA of 2.0 or greater.
